FACILITIES

Facilities

There are various facilities around towns where you can buy items or rest. Here is a short explanation on how to use these facilities.

Base

Viese and Felt each have their own base. Viese's is her atelier, and Felt's is in his camp. In it you will find a save book and can speak with your party members. In addition, you will find the following functions in your base.

● Full HP heal

✧ Entering your base will fully heal your characters, but it also resets the "Encounter Gauge" (P11)

● Switch Main Characters, Save and Load games

✧ In the Game Diary, you can choose from Save, Load, and "Change Character."

● Weapon Synthesis (Felt)

✧ During the game, press the X button in front of the anvil.

● Item Synthesis (Viese)

✧ Press the X button in front of the cauldron.

Tool and Item Shops

When in town, all you have to do is talk to the shop owners across the counter to buy tools and accessories. Every town has different items, and the inventory changes as time goes on so check back often. Moreover, there are members of the Zwiital Merchants Association in Belkhyde who specialize in trading. When you speak to these people, you can trade with them.

● Buy Items

Select what merchandise you wish to purchase from the shop's inventory.

● Sell Items

Select the items you want to sell from a list of your inventory. Basically the same as buying items.

ENCOUNTER

Encounter Gauge

When traveling around the field, you can gauge when a random encounter will occur. While traveling, the gauge will change color from blue → green → yellow → red, depending on how imminent the battle is. The amount of enemies left in the area is depicted by how full the gauge is. When the gauge empties, there are no enemies left in the area.

Property Reviews

Item Synthesis (Viese)

As a True Alchemist, Viese has the ability to combine items. Furthermore, she can take advantage of all the materials, items, and recipes that Felt has passed through the Share Ring. Item synthesis requires recipes. You cannot make an item without its recipe.

1 Select the item you wish to synthesize from the item list. The items to the right of the list are the materials used for the synthesis.

2 When you open the item synthesis menu, you have three options: "Substitute Materials," "View Property Reviews," and "Synthesize."
✱ If you don't have the materials for the recipe, you cannot synthesize the item.

3 Switch items
You can change the items you use in a recipe. Exchanging items can give different properties to an item, and in some cases create a completely new item.

4 Start Synthesis!
If items have the same review card, it will be upgraded. However, you can only have up to 4 review cards.

5 Item complete
Synthesized Mana Items will automatically be initialized.

6 Initialize
After you initialize an item, you can easily duplicate it.

Property Reviews

Every Harvested Item has at least one Property Review, such as "Increased Effect Radius." That is the extra effect of that item. By using items with property reviews for synthesis, you will be able to create items with other effects in addition to the original effect of the item itself. You can have up to 4 property reviews on one item, and combining items with the same property reviews will enhance the reviews, creating an even more powerful item.

Property Reviews

Weapon Synthesis (Felt)

During the game, Felt will gain the ability to do weapon synthesis. With this ability, he can use the items that Viese synthesizes with Mana to strengthen his party members' weapons.

1 Refine Mana Crystal
Select the character whose weapon you wish to strengthen. Then select the weapon you wish to synthesize.

2 Add to weapon
Select the weapon you wish to synthesize from the weapon tree. You can make any weapon adjacent to your current weapon.

3 Combine Mana Crystal
Begin mixing the materials. The weapon will possess the property reviews of the item you mixed with it.

You can make any weapons you have made before.

If the weapons are connected in the tree, you can synthesize it.

Secret Factor

As the story progresses, you can use the "Secret Factor."

Secret Factors are skills you can learn from Felt's synthesized weapons or Viese's synthesized items.

Learning Skills

Skills are acquired through obtaining Skill Points (SP) through battles. After you have mastered a skill, you will retain it even after you have unequipped the item. For a skill, should you continue using a weak item until you learn it? Or should you equip a stronger item with a worse skill? It's up to you on how you wish to develop your characters.

Item

Use an item from your inventory. Select an item from the item selection window to use.

Skill

Use a character's special skill. Select a skill from the skill window to use.

Run

Run away from battle. There is a possibility of failure. Also, when fighting boss characters this command will not be displayed.

Change

Select this to switch characters in the middle of battle. Characters switched in like this can act immediately.

RULE OF BATTLE

The battle is ended when either all of the enemies are defeated, or all of your party members are dead (LIFE = 0).

Victory

Victory is achieved by defeating all the enemies in an encounter. When you win, you gain experience, Cole (money), and occasionally items.

※ Defeated characters only get half experience after battle.

After battle, the battle results screen will show information on your acquired experience and money. When a character levels up it will display "LEVEL UP." Also, it will announce when a character has mastered a skill.

Game Over

It is Game Over when all of your characters' Life becomes 0.

ACTIVE COST TIME BATTLE

Active Cost Time Battle

Rather than using a turn based battle system, this game uses an Active Cost Time Battle System. Other than preparation for your action, the battle goes on in real time.

ACTB Bar

Character order is determined by their position on this bar. Character icons can start at any point in the bar and proceed toward the right. When the icon reaches the red ball at the end of the bar, it is their turn to act. The movement speed is determined by each character's speed. Furthermore, when a character is hit by a break attack their icon will be shifted left, thus slowing them.

Break System

The "Break Attack" attempts to push enemies back into the orange section of the ACTB bar. When an enemy is put into the broken status, you will see the amount of hits and damage that you deal. The more damage and hits that you deal, the more experience bonuses you will receive!

Skill Gauge

When you hit an enemy with a "Charge Attack" or get hit by an enemy attack, your skill gauge will increase. The skill gauge is necessary for all the skills that your party has.

※ "Charge Attacks" let you use your skills and "Break Attacks" let you do chains, so plan out your strategies!
